

# SOP for Replicate Prod Page to Pre-Prod

The use of pre-prod is to basically test Landing/ Retail Store pages like segmentation and other new features.

Inventory of pre-prod: <https://nykaa-widgets-staging.nykaa.com/dashboard>

URL linking Example for Retail Store:

<https://preprod.nykaa.com/storeDetail/O73?ptype=storeDetail&storeId=O73>

URL linking Example for Landing Page:

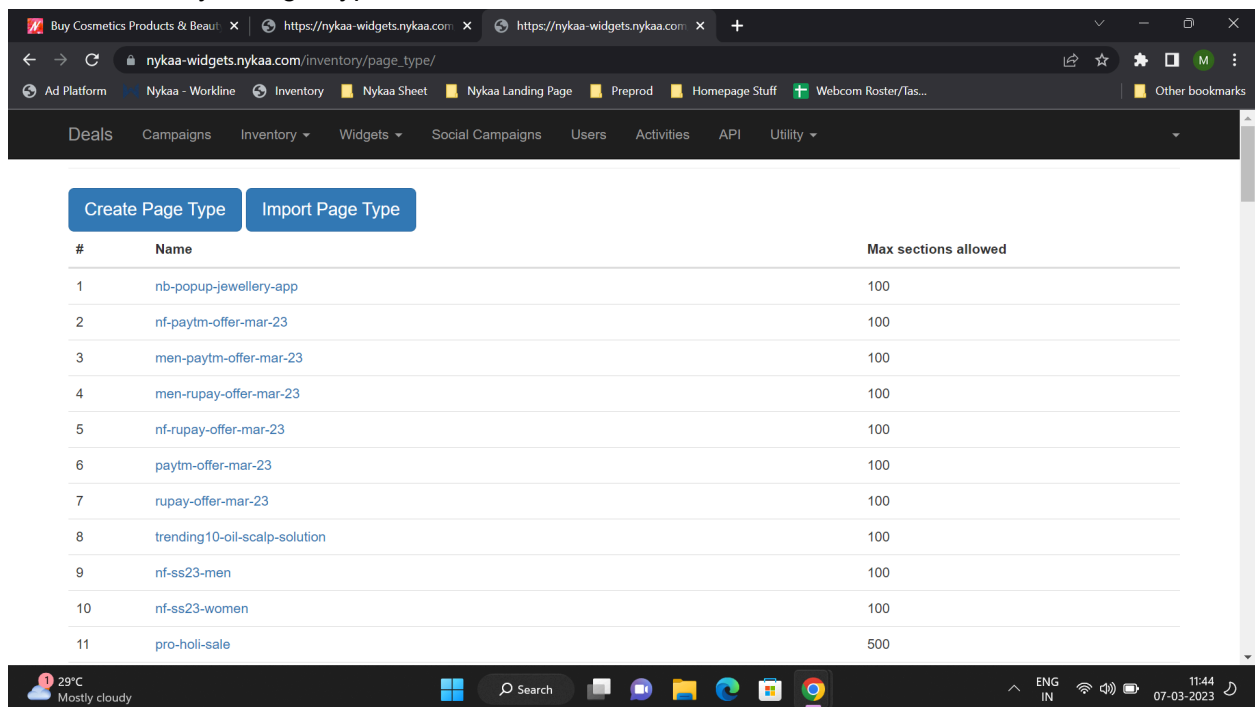

<https://preprod.nykaa.com/sp/new-customers/new-customers>

These are the following steps for replicating the prod page to a pre-prod environment.

Step 1: Find the page type in page type section on the prod ad platform.

Eg. page Type: make-up-sale

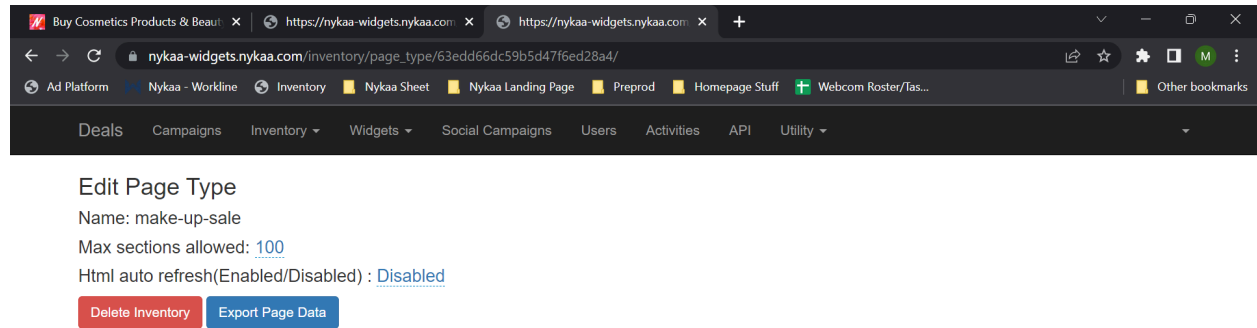

Go to: Inventory > Page Types

#	Name	Max sections allowed
1	<a href="#">nb-popup-jewellery-app</a>	100
2	<a href="#">nf-paytm-offer-mar-23</a>	100
3	<a href="#">men-paytm-offer-mar-23</a>	100
4	<a href="#">men-rupay-offer-mar-23</a>	100
5	<a href="#">nf-rupay-offer-mar-23</a>	100
6	<a href="#">paytm-offer-mar-23</a>	100
7	<a href="#">rupay-offer-mar-23</a>	100
8	<a href="#">trending10-oil-scalp-solution</a>	100
9	<a href="#">nf-ss23-men</a>	100
10	<a href="#">nf-ss23-women</a>	100
11	<a href="#">pro-holi-sale</a>	500

And, find out the page type here and click on the page type.

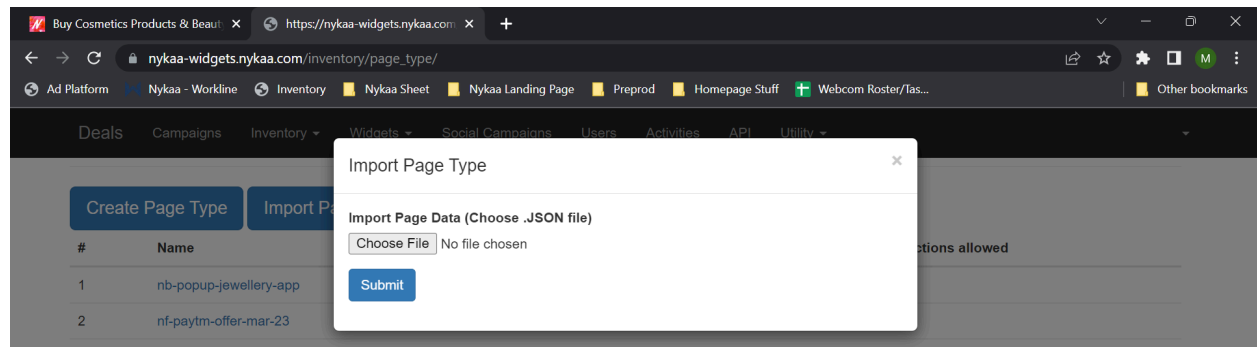

# SOP for Replicate Prod Page to Pre-Prod

Step 2: Click on Export page data, Now, open the pre-prod ad-platform.

Note: Pre-Prod ad-platform is same as prod ad-platform design wise.

Step 3: Go to: Inventory > Page Types and click on **Import Page Type**

Now, Click on choose file and add file that is downloaded on prod and click on submit, after a few minutes page is replicated to pre-prod environment.

Note: please publish all the inventory sections to take the page live in a pre-prod environment.
