

Splash Screen SOP

1. Objective

To define the standardized process for creation, validation, and scheduling of splash screens across Android and iOS platforms, ensuring timely execution and error-free deployment.

2. Scope

This SOP applies to all splash screen implementations requiring coordination between Webcom, Content/Design, NOC, QA, and Mobile (Android & iOS) teams.

3. Roles & Responsibilities

- **Webcom Team**
 - Coordinate with stakeholders
 - Manage tracker updates and JIRA creation
 - Ensure timely execution and communication
 - **Content/Design Team**
 - Provide creatives as per defined specifications
 - **NOC Team**
 - Generate and share image URLs
 - **QA Team**
 - Validate creatives and provide testing sign-off
 - **Mobile Teams (Android & iOS)**
 - Schedule and deploy splash screens
-

4. Process Flow

4.1 Timeline Update

- Splash screen **start and end dates** must be updated in the **Bottom Navigation Sheet** by the assigned stakeholders (Monalisa or Gargi).

https://docs.google.com/spreadsheets/d/1QLy6IRLYCzBPWJJJaXqnC0nL_nOu8D8PyHS7kiHroIUk/edit?gid=1281457361#gid=1281457361

4.2 Creative Procurement

- Webcom team to coordinate with the **Content/Design team** for splash screen creatives.
-

4.3 Creative Specifications

The creatives must be delivered in the following formats, with **two variations per format** (background-only and with copy/content):

- **Android:** 540 × 960
 - **iOS 2XL:** 640 × 1136
 - **iOS 3XL:** 960 × 1702
-

4.4 File Naming Convention

- All creatives must be **renamed manually before upload**.
 - Ensure each file includes **unique identifiers** (e.g., timestamp or version code).
 - This step is critical to prevent system conflicts caused by duplicate filenames.
-

4.5 JIRA Creation & NOC Coordination

- Create a **JIRA ticket** as per the standard template. Ref: <https://nykimage.atlassian.net/browse/DEVOPS-44774>
 - Share the ticket with the **NOC team via email**.
 - Request generation of **image URLs** for all creatives.
-

4.6 Tracker Update

- Upon receiving image URLs:
 - Update the **Bottom Navigation Tracker Sheet**.
 - Ensure correct updation across:
 - Android

- iOS 2XL
 - iOS 3XL
-

4.7 QA Validation

- Share the updated tracker with the **QA team (Kartik Gupta / Ayushi Garg)**.
 - Ensure:
 - Thorough testing is completed
 - QA comments are documented in the tracker
-

4.8 Scheduling & Deployment

- Post QA approval:
 - Tag respective **Android and iOS SPOCs**.
 - Request scheduling for the defined duration.
 - Monitor deployment to ensure timely execution.
-

5. Escalation Matrix

Android Team

- Anubhav Kumar Verma
- Anurag Mehta
- **Escalation Point:** Yogesh Suthar

iOS Team

- Aakash Tripathi
 - Rahul Singh Rawat
 - **Escalation Point:** Aman Sharma
-

6. Key Notes & Best Practices

- Ensure all inputs are received within defined timelines to avoid last-minute delays.
- Double-check creative dimensions and formats before proceeding.
- Maintain consistency and accuracy in tracker updates.

- Proactively follow up with stakeholders to ensure smooth execution.
